ENVIRONMENTAL MANAGEMENT POLICY

Concrete Logistics recognises that as a good corporate citizen it needs to provide and promote environmental policies, which demonstrate its commitment to protecting and repairing the environment.

Management commitment to this environmental policy is an integral part of company philosophy and is demonstrated through induction training and continuous consultation. The policy is initiated, developed and actively supported by all management at the highest level.

This environmental policy is consistent with the company's organisational aims and objectives and with the company's quality policy and health and safety policy.

The company is committed to ensuring that this environmental policy meets all of the relevant regulatory, heritage and legislative requirements and through its policy of continual improvement it will endeavour to improve its performance, particularly in the prevention of pollution and meet all the contractual requirements of its clients.

The company, through its performance of internal audits, reviews its environmental performance against defined criteria.

The results of these audits are presented to management for review.

This policy is implemented, maintained and communicated to all personnel and is made available to other interested parties, when required.
